# 10 JAPANESE START-UPS

## ExtraBold Inc.

ExtraBold Inc. is pioneering "Recycling Mobility-type Distributed Manufacturing" with 3D technology. They focus on 3D printing, compatible with diverse resins, using high-speed, large-scale printers. They're also researching 3D print heads for robots. Their "Green Creative™" initiative promotes the shift from petroleum to recycled resins and bioplastics.

## CADDI (THAILAND) Co., Ltd.

Like a caddie in golf, CADDi strives to guide the manufacturing industry to unleash its full potential with two pillars of business across the globe, 1)CADDi manufacturing to create a stable supply chain of high quality products and 2)CADDi Drawer, a cloud service to manage and utilize drawing data.

## Recursive Inc.

Recursive is a multinational AI startup that provides AI research and solutions related to sustainability. The four focus technologies such as Text Generative AI, Image Generative AI, Scientific AI and Recommendation & Forecasting are used to build a variety of case studies in accelerating Innovation, productivity, climate change action, and education.

## Quwak Inc.

Development of Quwak Me, a digital identity generation and authentication platform tied to physical. Passport? National ID card? If these are lost, you will not be able to prove yourself. Why can't you prove yourself yourself? We create a world where people can prove themselves anywhere, anytime.

## Spiber (Thailand) Ltd.

Spiber (Thailand) Ltd. is responsible for overseeing the construction and operation of a mass production plant that will manufacture powder serving as the raw material form of Brewed Protein fibers on behalf of Spiber Inc.. Additionally, we are also responsible for research and development initiatives related to relevant production methods and technologies.

## Thermalytica Inc.

Thermalytica is a clean-tech startup providing patented ultra-high performance thermal insulation materials and solutions (TIISA®) for key sectors, including the liquefied hydrogen supply chain, aviation and space, as well as emerging markets including sustainable manufacturing plants, EVs, and net-zero energy buildings.

## TOWING Inc.

TOWING Inc is a Nagoya University-born agritech company who realize sustainable agriculture for both earth and space. We develop and commercialize a soil additive "SORATAN" which works not only as soil additive but also as fertilizer, disease prevention, carbon capturing, and biomass upcycle method.

## Plant Life Systems Co., Ltd.

Development and provision of simple cultivation techniques based on mathematical model analysis of plant molecular biology. Providing cultivation technology to countries that lack it. Providing techniques for cultivating plants in adverse environments.

## KAICO LTD.

KAICO is a start-up from Kyushu Univ. and a platformer that develops and produces specialized proteins using with silkworms. We are moving forward with commercialization of the oral vaccine in three steps, feed additives, oral vaccine for animals and human. Feed additives for swine launch in a year in Vietnam.

## Bacchus Bio innovation Co., Ltd.

Our goal is to promote "bio-manufacturing" by combining "digital technology and biotechnology" to cultivate microorganisms (smart cells) that are optimized for mass production. We aim to be Asia's pioneer "Integrated Biofoundry®" and create a circular carbon economy by drastically transitioning from fossil-based manufacturing to bio-based ones.
